SUMMARY

There's a lot of bad training out there. For 12+ years I've built education programs with one goal: make learning clear, useful, and human. I design for adoption, not just consumption, and increasingly I build the systems themselves: learning platforms, diagnostic tools, and interactive experiences that help customers become confident, capable users of the product.

KEY RESULTS

- **4 yrs in 1**: Record Academy engagement: more than the previous four years combined, in a single year
- **91% vs 79%**: Renewal rate where someone took a course versus where nobody did
- **2,000+**: Global operators enabled by a process automation rollout

EXPERIENCE

Instructional Designer, Algolia | 2024–Now
Own customer education across onboarding, product training, and technical learning. Redesigned Algolia Academy around interactive and applied experiences, and built technical learning paths and certifications that drove record engagement — more than the previous four years combined in a single year.

Instructional Designer, Talkdesk | 2020–2024
Helped build and shape the education function as the company scaled. Owned internal onboarding for a global workforce and partnered with HR, leadership, and Sales Enablement on leadership development and sales enablement.

Instructional Designer, Kelly Services | 2018–2020
Designed interactive e-learning and assessments tied to operational goals. Built the training behind a large-scale process automation rollout, enabling adoption for 2,000+ global operators.

Administrative Co-op, Dow Chemical | 2016–2017
Led a data archival project covering 2,000+ confidential records in a highly regulated environment.

eLearning Developer, Delta College Corporate Services | 2015–2016
Developed e-learning modules and supported evaluation and refinement of training content.

SELECTED WORK

- **Learning Data and Renewal Signals**: Tied Academy activity to renewals, and checked it until it held up. Now part of how CS thinks about churn.
- **AI-Native LMS**: An AI-native LMS built around search, a tutor in every course, and what customers actually care about.
- **AI Tools for Customer Success**: Dashboards, review skills and an open-source library that automate the first pass and leave the call to people.
- **Executive Learning Path**: Five short courses for the leaders who fund the product, built to be shared by CS and Sales.

SKILLS

Focus areas: Customer education, instructional design, e-learning development, learning program strategy, enablement, learning analytics, applied AI in learning design, project management

Design & build: Claude Design, Claude Code, Adobe Creative Cloud, Figma

Learning: LMS administration, Articulate, Captivate, video and motion

Data & infrastructure: Learning analytics, Supabase, GitHub, Vercel, Google Sheets and Apps Script
