Customer Education | Learning Experience Design

There's a lot of bad training out there. For over a decade I've built education programs with one goal: make learning clear, useful, and human. I design for adoption, not just consumption, and increasingly I build the systems themselves: learning platforms, diagnostic tools, and interactive experiences that help customers become confident, capable users of the product.

EXPERIENCE as a learning path

- Rebuilt Academy around interactive, applied learning and launched technical paths and certifications that drove record engagement.
- Analyzed Academy activity against renewals and shared the findings with Customer Success. Now being integrated into health signals.
- Built AI tools for Customer Success and customers: a dashboard that flags broken implementations, first-pass review skills, and an open-source skills library for coding agents.
- Built an AI-native learning platform with search, an in-course AI tutor and intent-based paths. In internal testing.
